# Panasonic City

Panasonic City offers safe, smart, and life-enhancing solutions for residences, hotels, restaurants, factories, and offices. It calculates every situation to the finest detail with the products it creates according to the segment you want. Step into the Panasonic world now and discover the conveniences.

## Colourful, durable, and extraordinary designs in harmony with life.

Viko designs a switch or socket by being aware of the value of them in our lives and believes that they are more than a product. For this reason, he gives life to the products by designing them in many shapes, forms and even colours.

It is your turn to enjoy innovative products that adapt to life with their functional designs and offer convenience to their users.

touchless

White    Cream    Metallic White    Silver    Satin    Bronze    Anthracite    Smoke    Black

## TOUCHLESS SWITCH

Touchless allows you to control your lighting without touching the switch. The relay output is activated when the user brings his hand 5-7 cm close to the switch. The lamp remains on after the user removes their hand. When the lamp is switched off, the same process is repeated, and the relay is activated again.

### EARTHED SOCKET WITH 2 USB INPUTS

In addition to the earthed socket function, it also offers a type A USB charging socket.

### USB CHARGING SOCKET KARRE

2-piece type A USB charging socket.

## DIGITAL THERMOSTAT

The digital thermostat has 3 different setting modes. It offers thermostat settings in different modes to users with home mode, outdoor mode, and night mode.

## KARRE CLEAN

Thanks to its feature containing silver ions, it provides protection against microorganisms. With its simple and stylish design, it integrates with every area you want in your home.

## MULTI-LET 1050J GROUP SOCKET WITH SHOCK PROTECTION

It protects your electronic devices such as televisions, desktop and laptop computers, audio systems, printers and scanners from sudden voltage spikes that may occur on the mains.

- It absorbs the voltage with protection elements.
- Then it cuts the tension
- It loses shock protection and the ability to work as a standard socket.

Thus, it prevents problems that may occur afterwards.

## MULTI-LET GROUP SOCKET WITH USB

It offers the privilege of charging two different electronic devices at the same time without the need for an adapter. Multi-let USB Group Socket with 3 earthed sockets and 2 type A USB charging socket options with 2m cable, IP20 protection class and suitable for indoor use.

## Home appliances last longer, **lives** **are safer.**

VIKO Salt Product Solutions, designed to meet the requirements of modern installations in residential applications, equip you and your loved ones and living spaces with safe and secure solutions, while enabling you to take control.

Panasonic offers VIKO Fuse Boxes that are resistant to heat and impacts, Automatic Fuses that protect electronic devices at home against short circuit and overload, Residual Current Protection Relays that offer superior protection for your loved ones and living spaces, surge arresters that extend the life of devices, time clocks that allow you to take control and much more.

## AUTOMATED FUSES

VIKO Automatic Fuses are designed to meet the requirements of modern installations in residential applications with a wide range of products and accessories from 2A to 125A, protecting your home against short circuits and overcurrent faults.

Product Options

6 kA

10 kA

Product Options

30 mA

300 mA

## RESIDUAL CURRENT PROTECTION RELAYS

VIKO Residual Current Protection Relays protect human life against electrical faults that cause leakage current and prevent fires caused by leakage currents in electrical installations.

ENERGY SAVING

TIME SETTING

BUDGET FRIENDLY

## ANALOGUE TIME CLOCKS

With the recent increase in energy costs, VIKO time clocks enable you to save energy and take control in many residential applications such as controlling your lighting systems, park, and garden irrigation at desired time intervals without the need for sensors such as photocells.

ENVIRONMENTALLY FRIENDLY (RoHS)

IMPACT RESISTANT

## FUSE BOXES

VIKO Fuse Boxes are resistant to heat and impacts and do not emit harmful and toxic gases to the environment with their halogen-free feature. It offers a wide range of options in flush and surface applications that are both environmentally friendly and do not compromise on safety and security concepts.

Product Options

- B
- C
- B+C
- D

**SURGE ARRESTORS**

With a wide range of product options for all risk levels, VIKO Low Voltage Surge Arrester series with B, C, B+C, D type options according to the location and risk level in the installation, provides superior protection for your electronic devices and smart systems while preventing you from experiencing power outages in your homes against sudden overvoltages of internal and external origin.

# The power of lighting is at your home with Panasonic

Panasonic illuminates your home with its products combining high technology, superior performance, safety, and design. High efficiency with yellow, white and daylight options LED lamps, filament lamps that attract attention with their rustic appearance, ethane luminaires and floodlights that offer safe touches to garages and car parks have everything for you to live life in quality and comfort.

## Safety

### Complies with LVD Directives

Provides full protection against electric shocks with insulated outer body.

### Environmental Lighting

Panasonic LED Lamps, which do not contain heavy metals and toxic substances, comply with RoHS directives, and illuminate the spaces as an environmentally friendly product compatible with recycling.

### Healthy Light Source

Panasonic LED Lamps meet EN 62471 standards and have LEDs that do not emit UV and protect eye health.

## Efficiency

### Budget Friendly

Panasonic LED Lamps provide efficient, healthy, and safe lighting with energy saving.

### Long Life

Panasonic LED Lamps illuminate your spaces for 15,000 hours with its high-quality design and effective temperature management.

## STANDARD LED LAMPS

E14, E27 and GU10 socket options offer high quality, long-lasting and efficient lighting with wide wattage ranges.

## FILAMENT LED LAMPS

Panasonic LED Filament Lamps, which combine LED technology with decoration, provide high energy efficiency while adding elegance to your home. It offers ideal solutions in living spaces with E27, E14, ST64, G95 and G125 models and amber / transparent glass options.

## LED ETANGE ARMATURE

Standing out with its high technology, superior performance, safety and design, LED Etange Luminaire offers quality lighting in harsh conditions with its IP65 protection. With 120 and 150 cm options, it is ready to take its place in your garages.

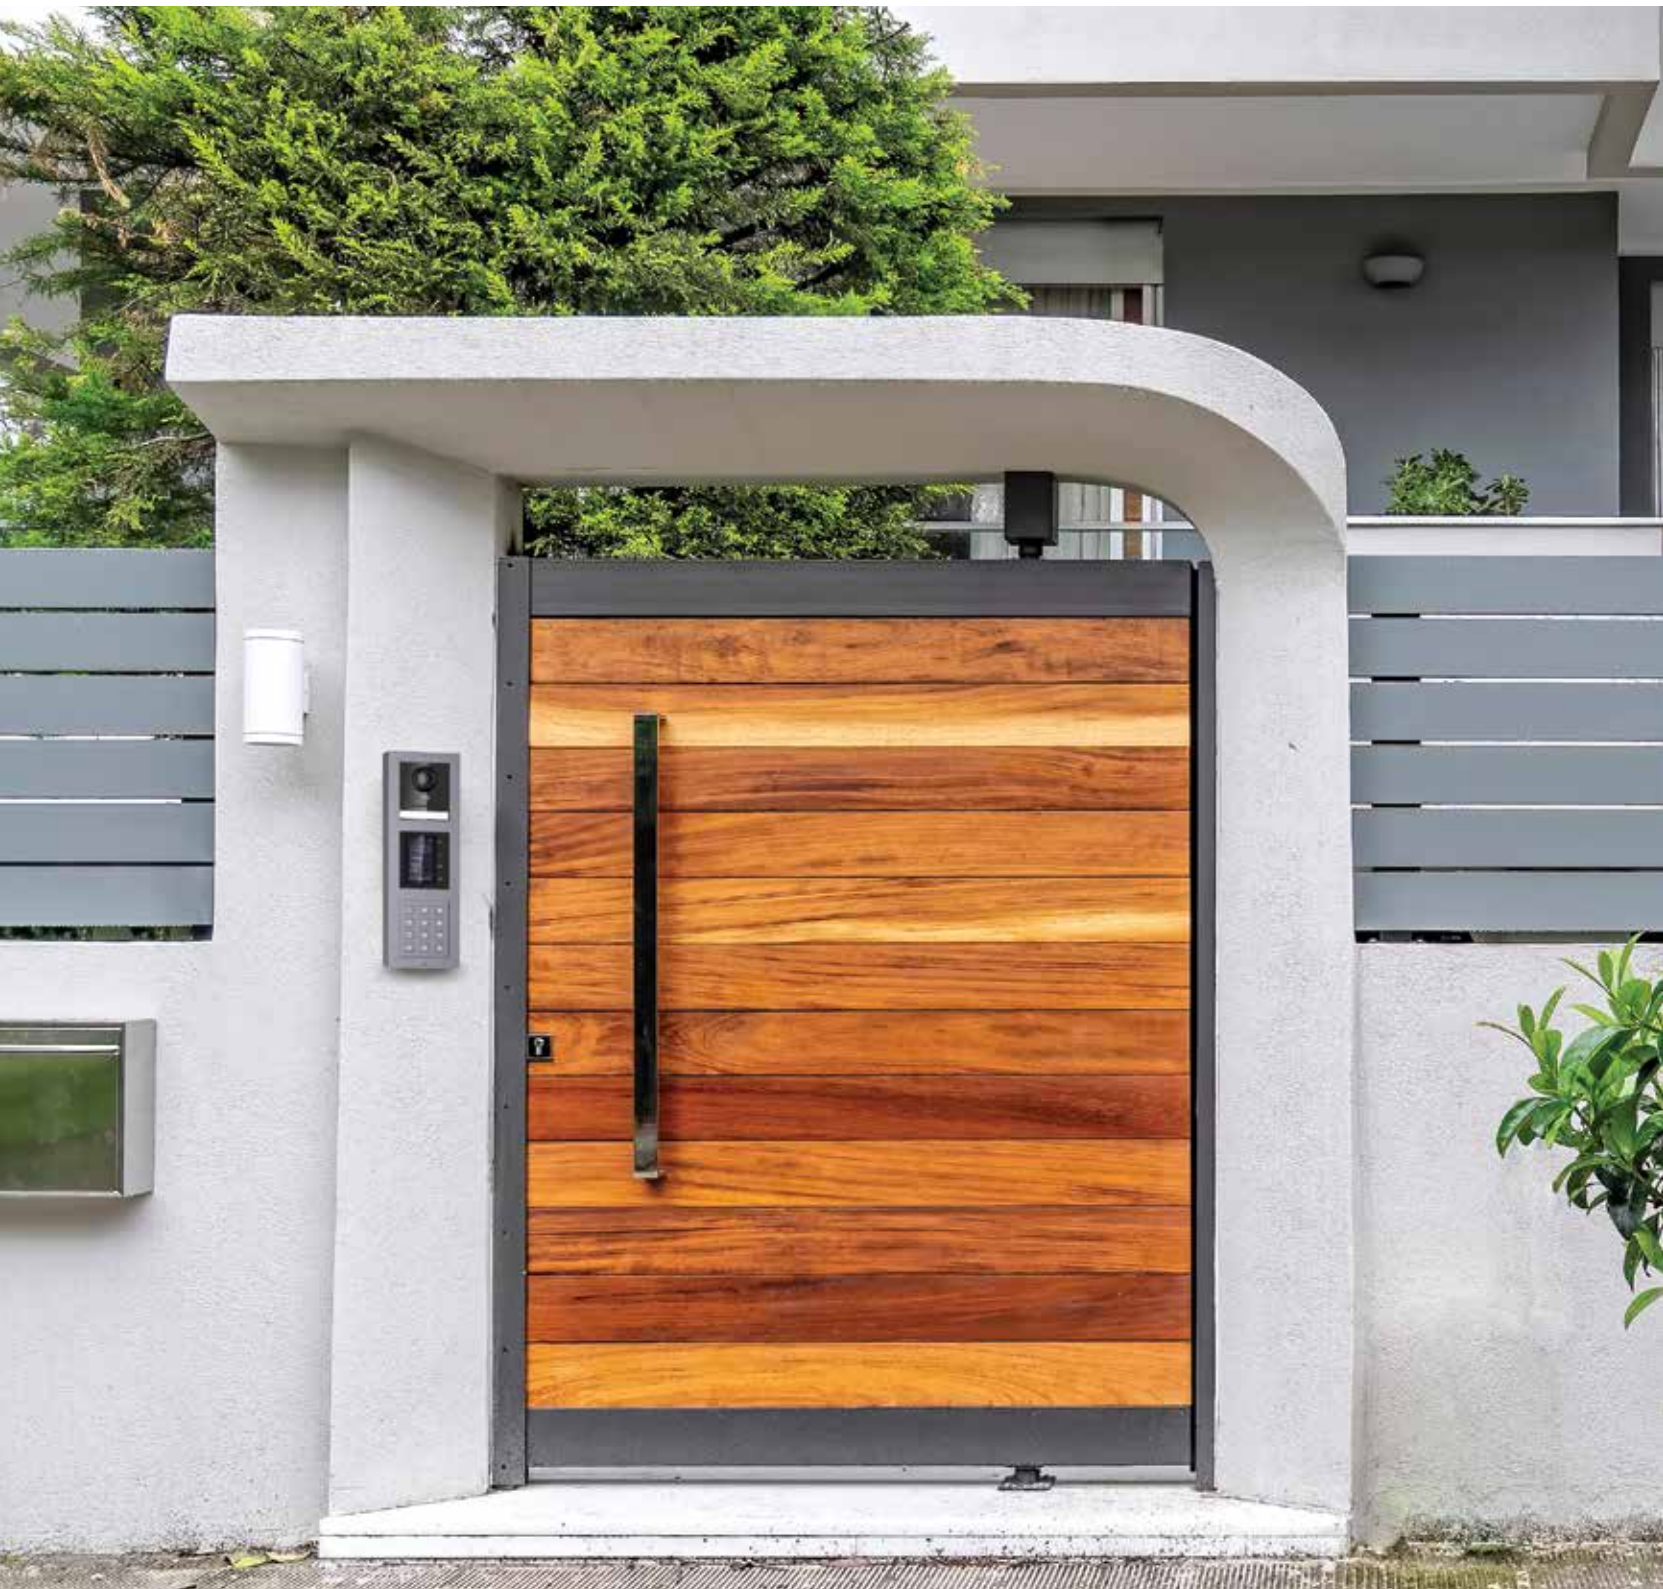

## PROJECTORS

Offering a wide range of products from 10 Watt to 200 Watt and attracting attention with its slim design, you can have durable, high quality lighting solutions in your car parks and gardens.

## Smart manager of the house, Intercom technology.

With Thea IQ IP Intercom, you are aware of incoming visitors even if you are not at home. You can make video calls with the mobile application and open the door if you wish.

You can take your home under full protection by adding security products such as flood detector, gas detector, motion detection detector to your system.

Thea IQ IP Intercom System;

- In case of alarm, it notifies you instantly by sending a notification to your mobile phone.
- If you wish, you can view the surrounding security cameras on the screen or mobile application.
- With the two relay outputs (Optional) on it, you can switch off all the electricity, manage the boiler or air conditioner.
- You can view the messages to be sent from the site management on the screen.

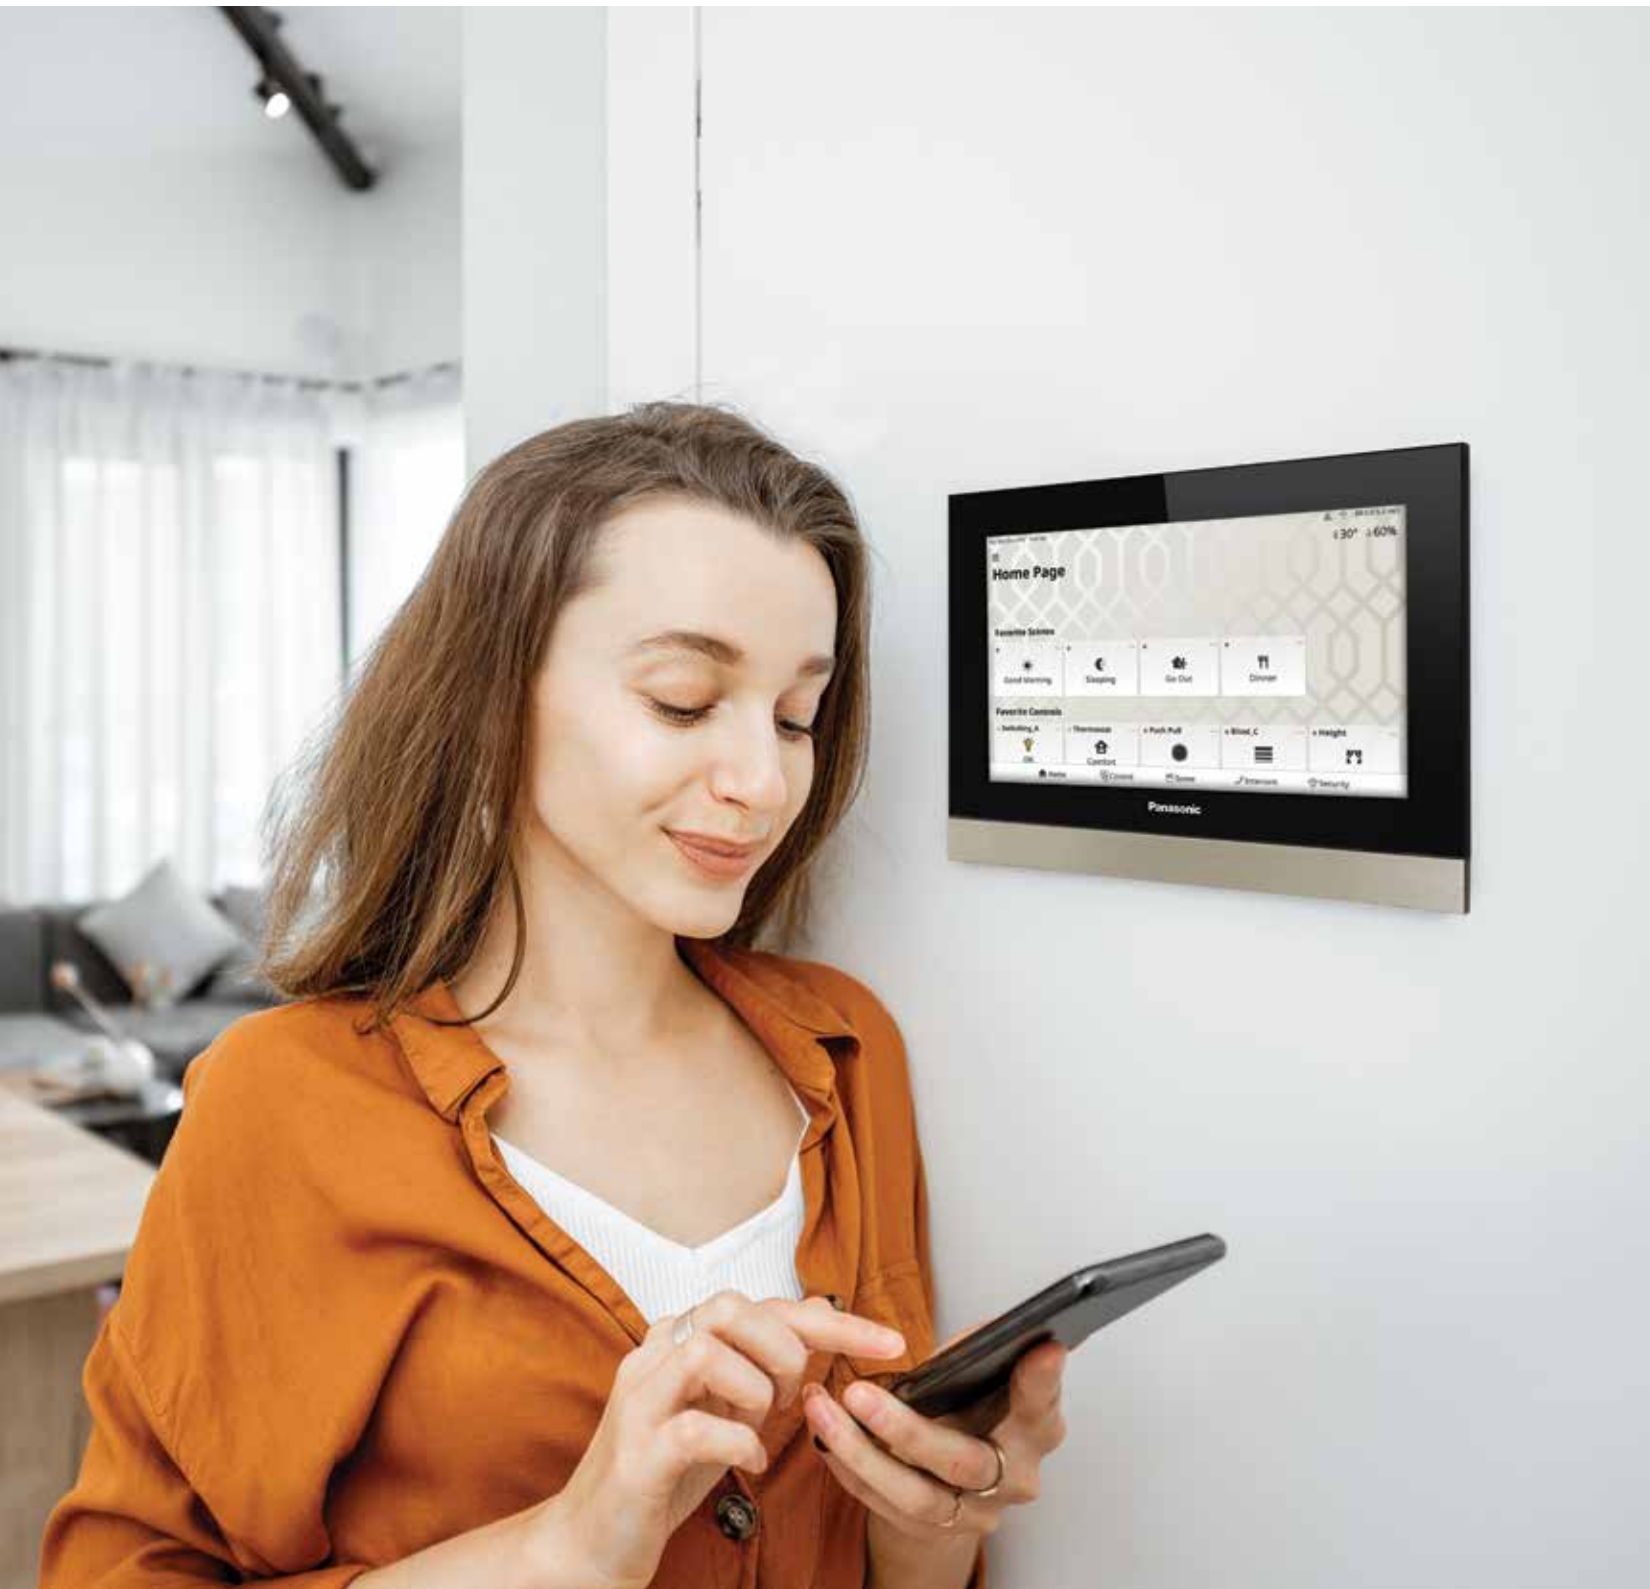

## INTERCOM SYSTEM

- One-touch security
- Eight zone alarm control
- Access from anywhere with mobile application
- Face recognition and contactless access
- Structured cabling in accordance with TCP/IP protocol
- Ability to monitor the images of the cameras used for security purposes from the touch screen in the flat or via mobile application

# Smart life, safe touches.

Panasonic also offers quality and technological solutions in home automation. The control of your home is at your fingertips with high technology and superior performance products that do not compromise on safety and design.

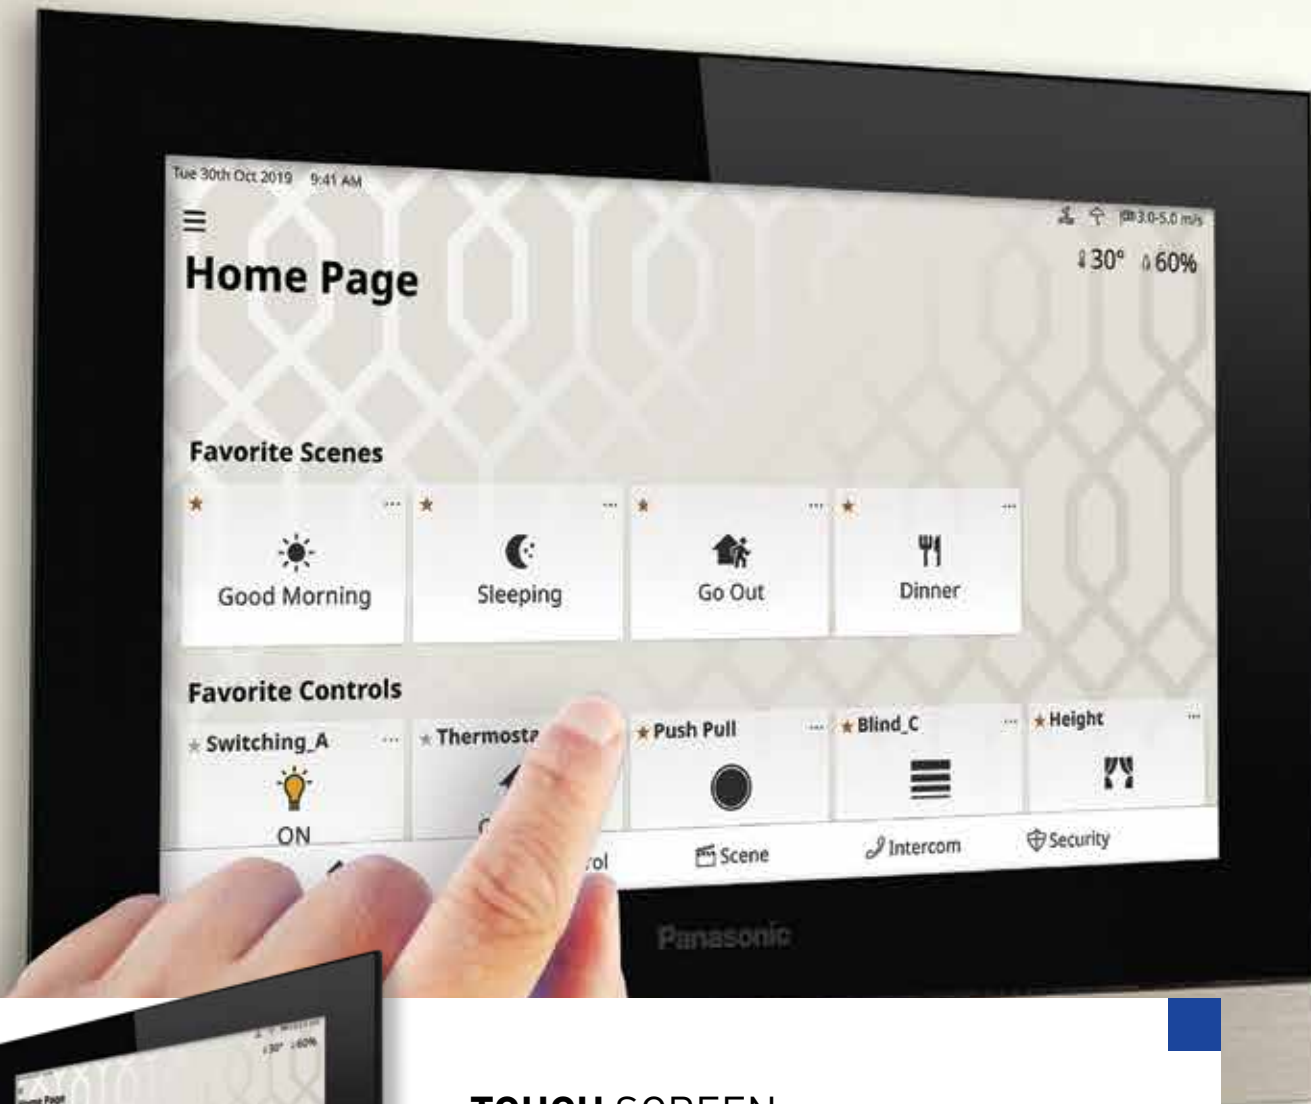

**And with KNX systems,**

- If you forget to switch off the lights, you can switch them off from outside using your smartphone.
- You can make your living space more comfortable with various types of dimming controls.
- You can use the time control function to switch the lights on and off automatically.
- You can switch on the lights automatically with presence sensors.

Solutions of KNX systems that make everyday life easier and offer comfort:

<p>Lighting Control (On/Off, Phase Dim, Dali, 1-10V, Dmx, Tunable White)</p>	<p>Motor Control (Curtains, Blinds; Shutters, Awnings, Sun Shading)</p>	<p>Air conditioning Control (Heating, Cooling, Ventilation)</p>	<p>Scenario Control</p>	<p>IP intercom (Video communication)</p>
<p>Safety</p>	<p>Energy Management</p>	<p>Remote Access</p>	<p>Time Dependent Automatic Control</p>	<p>Sensor Dependent Automatic Control</p>

## TOUCH SCREEN

The touch screen, which is used for central control in building automation systems, also allows remote control via mobile application. Video call in front of the door with IP intercom feature and connectivity to alarm detectors are among the main features of the product.

## AUTOMATION SWITCH

Switches that allow easy control within the room; fully compatible with modular frames. All the functions needed for the most basic functions such as lighting, curtains/blinds, and heating to complex controls can be easily managed.

## PRESENCE SENSORS

Sensors control the systems connected to automation depending on the asset. It saves money as it works only when needed. In addition, additional benefit is provided by switching on the lighting as needed depending on the light.

## PANEL MODULES

Products that perform many functions such as on-off, motor control, lighting can be easily programmed thanks to their modular structure. Our modules produced with high quality components are also suitable for industrial use.

## IR GATEWAY

The IR Gateway device realises the control of remote-control devices effortlessly. In this way, it makes it possible to include devices such as TV, projection, air conditioning in automation.

For more than 100 years,  
we have been working for a more livable world.
